We are born with a
global vocation!!

Graffos timeline

Since our birth in October 2014, we have designed a strategy based on finalizing developments in 2015, package algorithms, branding, systems architecture, Web, Landig Pages, etc. To be ready from June 2016 to start commercialization in Spain and opportunistic actions in international markets.

In 2017 we will consolidate the business in Spain and start access to internationalization, waiting for its consolidation in 2018.

You have to think big, without
limitations of insularity...!!
